

PanelShop.com Quality

PanelShop.com's Quality Management System was developed and implemented to document the company's best practices and ensure superior project management. This system has led to reaching and maintaining two very important organizational goals: superior quality and complete user satisfaction.

PanelShop.com quality is driven by a stringent quality control system that oversees the online configurators, pre-engineered drawings, bills of material, testing procedures, and document control. This Quality Management System ensures that every panel or component produced meets the performance needs of our customers.

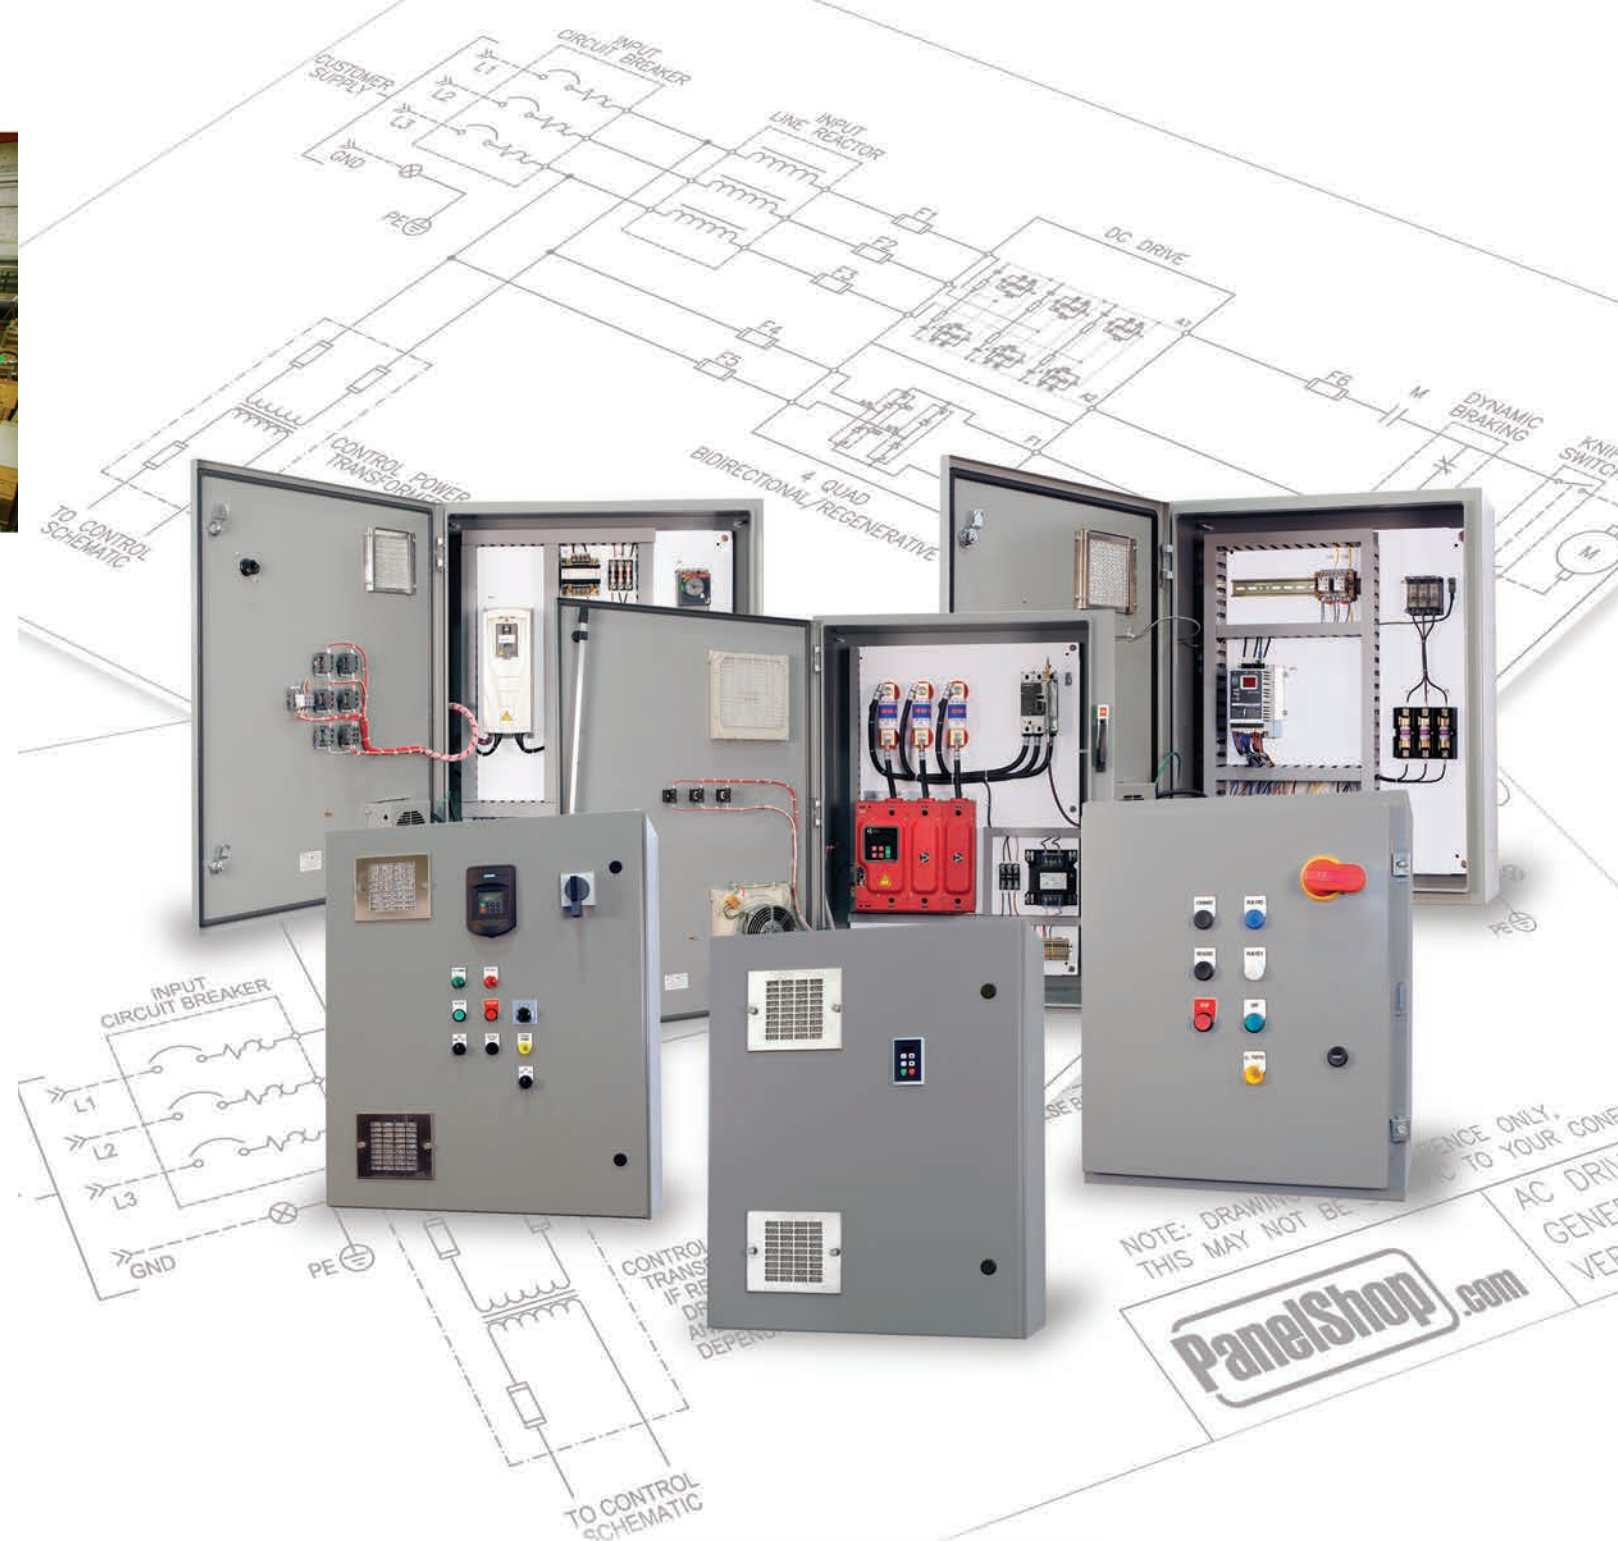

Our teams of senior-level engineers, assemblers, wiremen and test technicians all have extensive experience in the automation industry. All PanelShop.com assemblers and wiremen have been trained regarding company standards, tools, processes and safety procedures.

PanelShop.com Support

Support for your project is a priority at PanelShop.com. Through our product configurators, many of your support needs have already been addressed by implementing strong electrical engineering into your selections. We are proud and confident in stating that any configuration made on our site has been verified by our engineering team as a correct and sound electrical solution.

Whether it's talking to one of our engineers while building a control panel, troubleshooting over the phone, online chat, or our service team **going on-site for commissioning or field services**, we promise you quality, reliable support.

Innovative Panel Building Online

Three-Tiered Panel Testing Method

Tier 1

Wiremen verify & sign-off individual workmanship.

Tier 2

Area group leaders complete 2nd test performing pre-power checks & verifies accuracy.

Tier 3

Test Technicians perform final quality examination: includes wire pull tests, point-to-point ohm check, component verification & power up.

MADE IN THE USA

Your Online Resource For Electrical Control Panels

PanelShop.com is an eBusiness solution provider that empowers users, to design high quality electrical control panels online. PanelShop.com produces user-configured control panels, as well as custom built configurations designed to meet your automation needs. This is PanelShop.com's innovation; to make the procurement of an electrical control panel easier, cheaper, and faster for you.

PanelShop.com has an extensive network of electrical control manufacturers to ensure a variety of products are available. With a highly experienced staff on-site, users of PanelShop.com are in the hands of a knowledgeable, highly capable team, eager to address your needs.

Custom orders are a major part of how we best serve our customers. We have the capabilities to deliver outstanding results for your custom needs large or small. For your custom projects simply visit PanelShop.com, click on "REQUEST A QUOTE" and upload your files!

Custom Requests >>

Benefits of using PanelShop.com

- 24/7 availability to design and purchase configured electrical control panels
- Major manufacturers available all on one site
- Custom configuration of electrical control panel to user's specific needs
- Multiple-bid policy requirements satisfied by providing several configurable options
- Real-time quoting & pricing resulting in extensive time and cost savings
- High-quality general schematics provided for every configuration
- Lower cost based on pre-engineered components and services
- UL Certified upon request to meet user quality standards
- Limit risk through standardized pre-engineered products
- Comprehensive support from product training to on-site field service and commissioning

How Online Configurators Save Time & Money

Start Building Electrical Control Panels Online

Most customers understand their electrical control needs, but struggle to find an avenue to get them quoted, engineered and assembled in a timely fashion.

Using a configuration tool and development of standards allows for quick:

- Pricing
- Assembly
- Testing

Some large manufacturers have configuration tools for their specific products, but only allow distributors access to their:

- Expertise
- Drawings
- Quotes

To develop these standards it takes a significant investment of:

- Time
- Money
- Resources

30% SAVINGS

Typical Order worth \$5,000.00

Traditional Method			vs.	Online Method		
Total	Rate	Hours		Hours	Rate	Total
\$45.00	\$90.00	0.5		0	\$90.00	---
\$270.00	\$90.00	3	Phone Conversation	0	\$90.00	---
---	---	---	Develop Quote	0	\$90.00	---
---	---	---	Receive Order	---	---	---
\$360.00	\$90.00	4	Engineer Bill of Materials	0	\$90.00	---
\$360.00	\$90.00	4	Engineering Drawings	0	\$90.00	---
\$270.00	\$45.00	6	Drafting	0	\$45.00	\$220.00
\$220.00	\$55.00	4	Ordering Parts	4	\$55.00	\$1,895.00
\$1,895.00	\$1,750.00	1	Actual Parts	1	\$1,400.00	---
\$110.00	\$55.00	2	Printing of Wire Numbers	0	\$55.00	\$1,320.00
\$1,320.00	\$55.00	24	Assembly	24	\$55.00	\$1,320.00
\$150.00	\$75.00	2	Testing	2	\$75.00	---

\$5,000 vs. \$3,585

Example of Configuration Tool for Variable Speed Drives

Why This Saves You Money?

- Purchasing** will be able to get multiple bids from different manufacturers through our site alone, satisfying multiple bid policy requirements.
- The ability to quote on-line reduces a customer's time involved in the selling process.
- Standardization in manufacturing will limit risk for companies. This is an important factor in spending considerations when upgrade money is difficult to acquire.
