

# ScorBox

Improve Manufacturing Efficiency

Scrolling Marquee

Stack Lights

Overhead Monitor

Spreadsheets

OPC/Hardwired  
to Your Machine

Smart Device

Email

## Features:

- **Visual data communication** through optional pilot lights, stack light, scrolling marquee, and tv monitor
- **Export data in real time** into Microsoft Excel or CSV files to conduct further analytics
- **Pre-programmed PLC and HMI** gets your ScorBox up and monitoring quickly
- **Analog, digital inputs, and high speed counters** connect to existing sensors on equipment
- **Reports** can be scheduled or manually sent right to your email
- **Customizable metrics** allow for greater flexibility and more precise monitoring
- **Easy communication** through the touch capable HMI and optional keyboard and mouse
- **Remote monitoring** via dedicated IP address to tablets, smart phones, and more
- **OPC Connectivity** allow data to be shared with other visualization systems
- **Email alerts** to keep you in the know

Customer Driven Controls

ScorBox is an ideal product solution to contribute to Overall Equipment Effectiveness (OEE) on the manufacturing floor.

Optimal for any production facility, the ScorBox will automatically keep track of your machines' Overall Equipment Effectiveness (OEE) without incorporating a large scale monitoring system. With analog and digital inputs connecting to already existing sensors, ScorBox provides product counts, rejects, cycle times, and more.

The ScorBox allows operators and managers alike to keep a close watch on the production line and provides notifications when efficiency is below a set standard.

## Analog/Digital Inputs

## Track Efficiency

## Visual Data

## Customizable Metrics

- The ScorBox also enables communication through email, with the ability to choose predefined recipients and messages. It will automatically tell supervisors or managers when a line goes down for a preset amount of time.
- ScorBox can be customized with special features, metrics, and enclosures.

## Manufactured by Premier Automation

**Premier Automation** is an industry leading engineered solutions company focused on providing best-in-class automation, drives, power electronics, electrical control & OEE solutions, panel building, and services for the industrial market. Visit [www.premierautomation.com](http://www.premierautomation.com) for more information.

## Premier Automation Offers:

- **Significant expertise** in tailored engineered solutions designed specifically for our customers.
- **Decades of experience** in industrial automation.
- **Multiple manufacturer solutions** (ABB, Allen-Bradley, GE, Siemens, etc.) to meet our customer's specifications.
- **High value and dependable performance** come standard on all of our engineered solutions.
